

FCC,

This has to be one of the worst suggestion I have ever heard for Amateur Radio. Do not do it in any form shape or manner. At this rate you'll simply be sending a license to anyone who writes in for one. Years of experience do not ensure knowledge, let alone an increased knowledge in the field. Just look at today's "Rice Box" operators! We need to increase the gene pool not dilute it.

Respectfully Submitted,

Alan K. Unangst, WC7R
